Project Flow

TRAINING - A REQUISITE

SIS offers exclusive industrial training which focus on students desires in Research & Development sector. The key strengths of stupors are ability to make the student eligible for industry standards. In educational institutions, No formal studies available to equip a student with knowledge of different inputs required for the job performance. It leads to requirement of Special industrial training. On this basis, we created a methodology in which Knowledge exposure is a primary component and it will create step by step environment for all round development of skills. In our organization, we encourage our experts to play a facilitator role, in the more advanced levels with their primary role being to guide and assist students in achieving their own individual learning objectives.

Why we are unique?

- We have developed a great understanding of how to assist students in the basis of industry.
- Excellence in executing short and long-term projects to your specific requirements.
- Deep domain knowledge in diverse fields.
- Having a database of more well structured real time and Research & Development projects.
- Largest global databases of project outsourcing experts.
- Providing clear project objectives, milestones, tasks, and resources to students.
- Good Technology transfer.
- High-quality service at an affordable cost.
- Separate team to help student in different location.
- Training and coaching for projects are available in all streams.
- Creating a position for student to meet industry needs.
- Training infrastructure provides working experience to the students.
- R & D project training will boost up the students career.
- Training will furnish required skills to manage new technology in various domains.

Facilities

- Online lectures for assisting formal, theoretical and technical knowledge.
